Electronic Bulletin Board (EBB)

Public Service Company of Colorado

Public Service Company's (PSCo) Gas Transportation Service enables our natural gas customers the choice to purchase their gas from third party suppliers. PSCo becomes the customer's gas transportation provider, rather than their sales gas provider.

PSCo operates an extensive gas delivery system that offers a great deal of flexibility. We have over 24,000 miles of high and low pressure pipeline facilities, which helps us move gas throughout Colorado. We also have direct access to major interstate pipelines and regional natural gas basins that give End Use customers and Shoppers more options to buy or sell a competitively priced commodity.

Our gas transportation services are provided through the following company facilities:

- Public Service Company of Colorado
- Public Service Company of Colorado's Front Range Pipeline

If you have any questions concerning this service, please don't hesitate to contact us.
